DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 24, 26, 27, 29 and 31-35, drawn to a device for aligning food bars of different lengths simultaneously, without carrying a trimming slice.

Group II, claim(s) 25, 30, drawn to a device for preventing high compression of food bars.

Group III, claim(s) 28 and 39-46, drawn to a device for extending food bars.

Group IV, claim(s) 36-38, drawn to a central unit.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: each group has its own special technical feature as listed above. None of these special technical features are common to the other groups, nor do they correspond to a special technical feature in the other groups. Therefore, unity of invention is lacking.

2. If the Applicant elects group III, the Applicant is further required to elect one of the following groups:

Group V, claim(s) 28, 39-41 and 43-46, drawn to a claw and grip system.

Group VI, claim(s) 28, 39, 40, 42 and 43-46, drawn to a vacuum system.

The inventions listed as Groups V and VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: each group has its own special technical feature as listed above. None of these special technical features are common to the other groups, nor do they correspond to a special technical feature in the other groups. Therefore, unity of invention is lacking.
